Lecture 05

Data Preprocessing and Machine Learning with Scikit-Learn

(Computational Foundations Part 3/3)

STAT 479: Machine Learning, Fall 2018

Sebastian Raschka

http://stat.wisc.edu/~sraschka/teaching/stat479-fs2018/

Part I: Introduction

- Lecture 1: What is Machine Learning? An Overview. [Lecture Material]
- Lecture 2: Intro to Supervised Learning: Nearest Neighbor Methods [Lecture Material]

Part II: Computational Foundations

- Lecture 3: Using Python, Anaconda, IPython, Jupyter Notebooks [Lecture Material]
- Lecture 4: Scientific Computing with NumPy, SciPy, and Matplotlib [Lecture Material]
- Data Preprocessing and Machine Learning with Scikit-Learn

Part III: Tree-Based Methods

- Decision Trees
- Ensemble Methods

Part IV: Evaluation

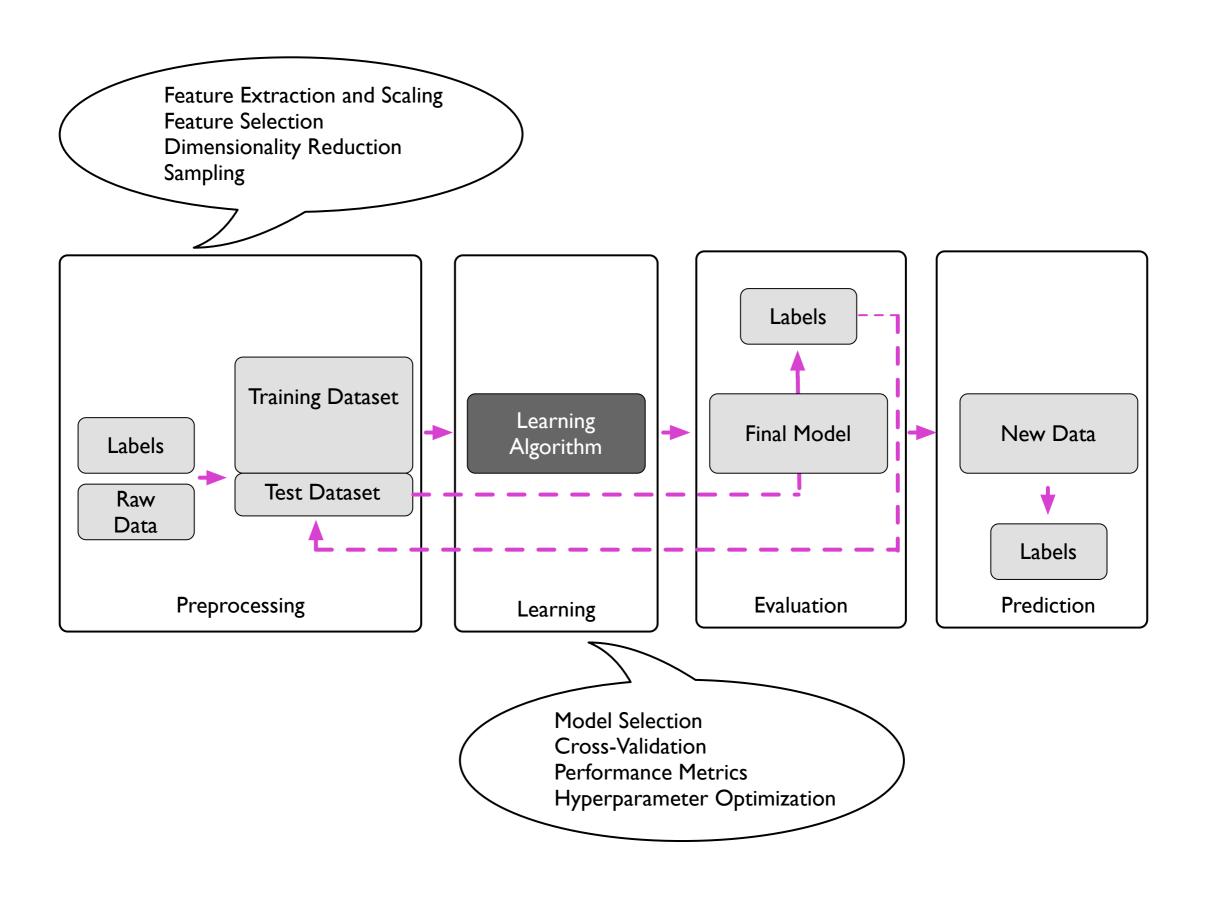

- Model Evaluation and Performance Metrics
- Model Selection and Cross-Validation

Part V: Dimensionality Reduction

- Feature Selection
- Feature Extraction

Part VI: Bayesian Learning

- Bayes Classifiers
- Text Data & Sentiment Analysis

Iris-Setosa

Iris-Versicolor

Iris-Virginica

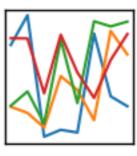

Fisher, R.A. "The use of multiple measurements in taxonomic problems" Annual Eugenics, 7, Part II, 179-188 (1936); also in "Contributions to Mathematical Statistics" (John Wiley, NY, 1950).

- example2: 0.00 -> class 2

- example3: 1.21 -> class 1

$h(z) = \begin{cases} 2 & z \le 0.6\\ 1 & otherwise \end{cases}$

Given 3 NEW examples:

- example4: 5 cm -> class?

- example5: 6 cm -> class?

- example6: 7 cm -> class?

Estimate "new" mean and std.:

- example5: -1.21 -> class 2

- example6: 0.00 -> class 2

- example7: 1.21 -> class 1

Given 3 training examples:

- example1: 10 cm -> class 2

- example2: 20 cm -> class 2

- example3: 30 cm -> class 1

Estimate:

mean: 20 cm standard deviation: 8.2 cm

Standardize (z scores):

- example1: -1.21 -> class 2

- example2: 0.00 -> class 2

- example3: 1.21 -> class 1

$$h(z) = \begin{cases} 2 & z \le 0.6\\ 1 & otherwise \end{cases}$$

- example4: 5 cm -> class?

- example5: 6 cm -> class?

- example6: 7 cm -> class?

Estimate "new" mean and std.:

- example5: -1.21 -> class 2

- example6: 0.00 -> class 2

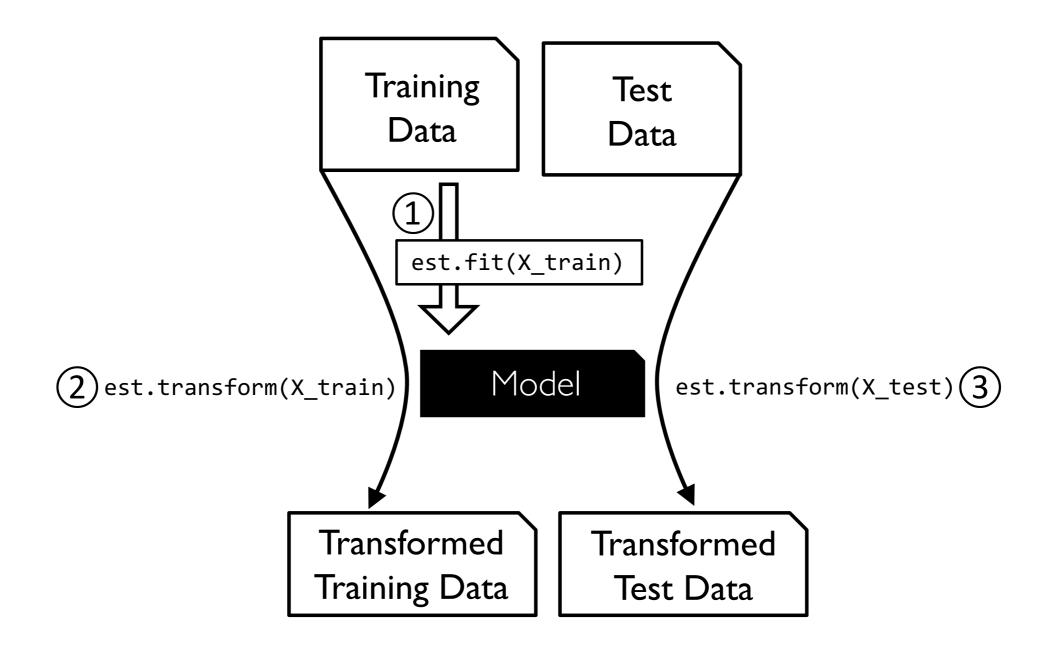

- example7: 1.21 -> class 1

- example5: -18.37

- example6: -17.15

- example7: -15.92
